# Morbidity and Mortality Weekly Report (MMWR)

Infectious & Emerging Diseases  
in the ASEAN Region

With Support by:

Korea Disease Control and  
Prevention Agency

in partnership with  
Canada

Kemenkes

ASSOCIATION  
OF SOUTHEAST  
ASIAN NATIONS

This report aims to provide the current situation on infectious and emerging diseases in the ASEAN Region. We collate various information from multiple official sources and publicly available sources and is published every week on Wednesday. ABVC follows Epi-week calendar in its publication. For feedback and/or suggestions, please write to [support@aseanbiosurveillance.org](mailto:support@aseanbiosurveillance.org)

A person wearing a full-body white protective suit, including a hood and a face mask, is shown in a laboratory or clinical setting. The person is holding a black object, possibly a sample or a tool, in their gloved hand. The background is slightly blurred, showing what appears to be a laboratory environment with blue and white tones.

## Mpox Cases Reported in the ASEAN Region

January 1, 2025 – April 4, 2026

Source:

1. Ministry of Health Cambodia
2. Ministry of Health Republic of Indonesia (<https://infeksiemerging.kemkes.go.id>)
3. WHO Mpox Outbreak: Global Trends, accessed April 7, 2026 ([https://worldhealthorg.shinyapps.io/mpx\\_global/](https://worldhealthorg.shinyapps.io/mpx_global/))
4. Communicable Disease Agency, Ministry of Health Singapore, accessed April 7, 2026, <https://www.cda.gov.sg/resources/weekly-infectious-diseases-bulletin-2025/>

### Key Findings

- The number of Mpox cases from January 1 to April 4, 2026, are **34 cases** with **one death**.
- There were **no new cases of Mpox** in epi-week 13 of 2026.
- **58,334 confirmed cases** of mpox have been reported in **other regions** (other than the **ASEAN** region):

### Mpox cases in the ASEAN region in 2025 and 2026 (as of 4 April, 2026)

ASEAN Member States	Cumulative Cases in 2025	Cumulative Deaths in 2025 (CFR)	Cumulative Cases in 2026	New Cases in epi-week 13	Cumulative Deaths in 2026 (CFR)

# COVID-19

## Key Findings

- Recently, the number of **confirmed COVID-19 cases reported to ASEAN are declining** compared to the previous year.
- The number of confirmed COVID-19 cases reported from 1 January 2026 to 4 April 2026 are **7,975 cases** with **0% Case Fatality rate (CFR)**
- In March 2026, this week indicates that SARS-CoV-2 circulation in ASEAN remains confined to **Omicron**, with most countries now dominated by JN.1 or its monitored descendants and no new variant of concern detected. **JN.1** or **JN.1-derived lineages** (including **LP.8.1**, **NB.1.8.1**, **KP.3**, **XEC** and **XFG**) account for the majority of sequences in Indonesia, the Philippines, Lao PDR, Singapore, Thailand and Vietnam, while Brunei Darussalam remains largely **BA.\*-driven** and Myanmar continues to be dominated by **XBB.1.16** and related **XBB lineages**, reflecting a heterogeneous but overall stable variant landscape across the region.
