Morbidity and Mortality Weekly Report (MMWR)

Infectious & Emerging Diseases
in the ASEAN Region

With Support by:

Korea Disease Control and
Prevention Agency

in partnership with
Canada

Kemenkes

ASSOCIATION
OF SOUTHEAST
ASIAN NATIONS

This report aims to provide the current situation on infectious and emerging diseases in the ASEAN Region. We collate various information from multiple official sources and publicly available sources and is published every week on Wednesday. For feedback and/or suggestions, please write to support@aseanbiosurveillance.org

Emerging Diseases

A medical professional, likely a doctor or scientist, is shown from the chest up. They are wearing a white lab coat over a dark shirt, a white surgical mask, and a light-colored surgical cap. They are holding a dark, cylindrical vial or bottle in their right hand. The background is dark and out of focus, suggesting a medical or laboratory setting.

MPOX

Mpox Cases Reported in the ASEAN Region

January 1, 2023 – December 6, 2025

COVID-19

Key Findings

- As of 6 December 2025 (5PM, GMT+7), there were **778,858,542** confirmed cases **worldwide**, including **7,102,794 deaths**. Globally, the Case Fatality Rate (CFR) was **0.91%**.
- 37,760,304 total confirmed cases** of COVID-19 have been reported in the **ASEAN Region**.
- The CFR in the **ASEAN Region** was **0.98%**.
- In November 2025, the latest submission on GISAID by Indonesia and Brunei Darussalam showed dominance in **Omicron B.1.1.529+BA.*** variant. Meanwhile, other member states such as Lao PDR, Cambodia, Malaysia, Singapore, Thailand, and Viet Nam were still dominated by **NB.1.8.1** variant.

ASEAN Weekly COVID-19 Cases and Deaths

From January 1, 2024 to December 6, 2025

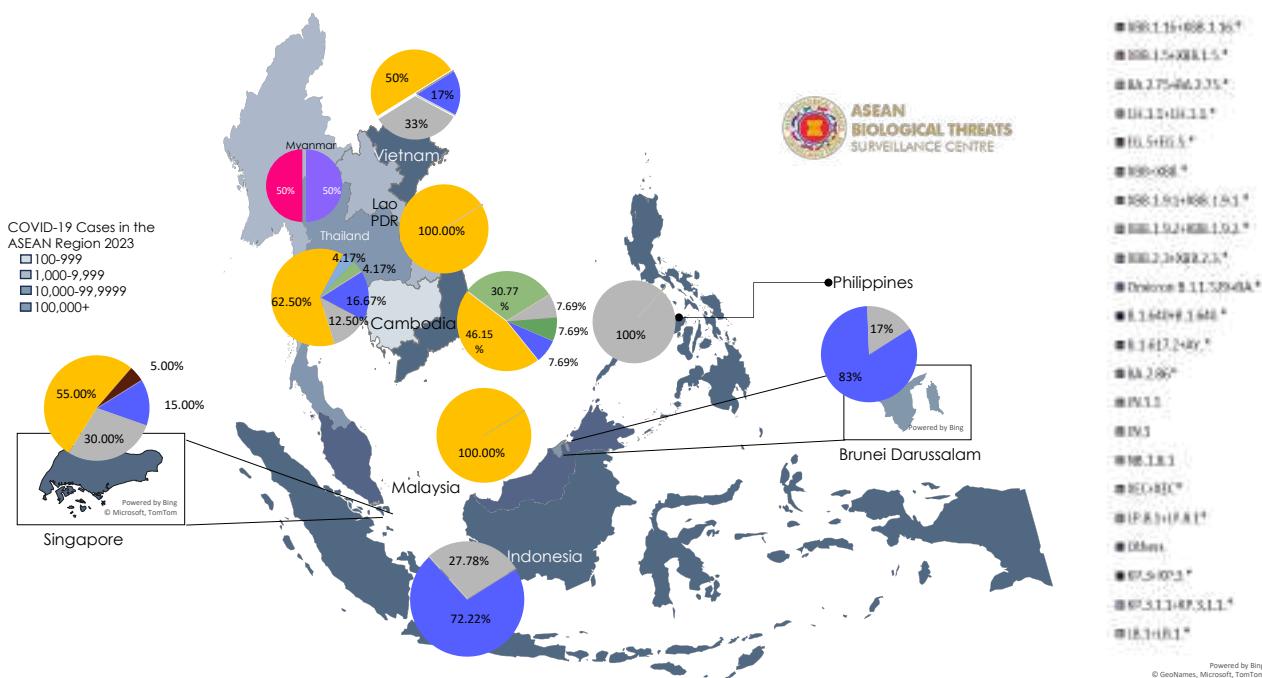

Sources: [Singapore Government](#), [MOH Indonesia](#), [MOH Cambodia](#), [DDC Thailand](#), [MOH Myanmar](#), [MOH Malaysia](#), and [WHO](#) accessed on December 9, 2025

- A major peak in case numbers occurred in mid-2025 until week 22 as the highest peak of the cases reported. Meanwhile, after week 23, the cases continued to decrease significantly until the week of 49.
- The latest updated of COVID-19 cases were reported low by ASEAN Member States.

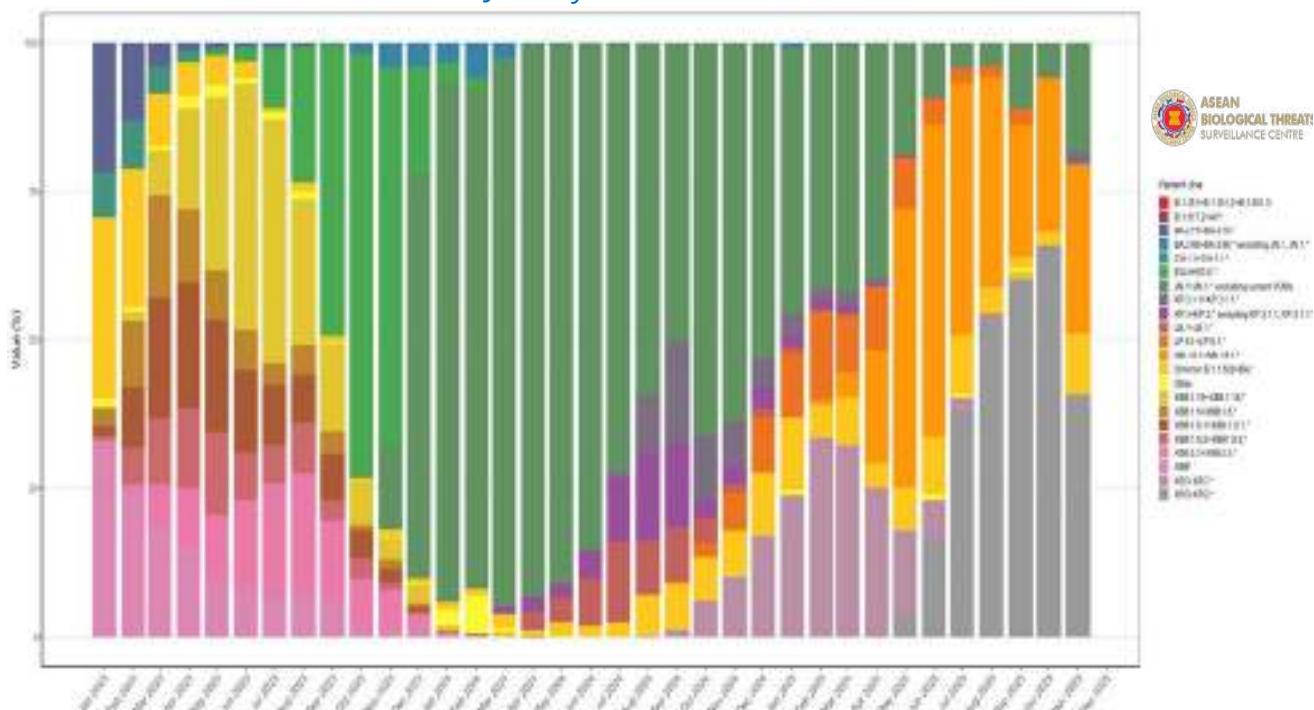

COVID-19 Variants Frequencies Among the ASEAN Member States As of November 2025

In November 2025, the latest submission on GISAID by Indonesia and Brunei Darussalam showed dominance in **Omicron B.1.1.529+BA.*** variant. Meanwhile, other member states such as Lao PDR, Cambodia, Malaysia, Singapore, Thailand, and Viet Nam were still dominated by **NB.1.8.1** variant.

COVID-19 Variants Frequencies in the ASEAN Region From January 2023 to November 2025

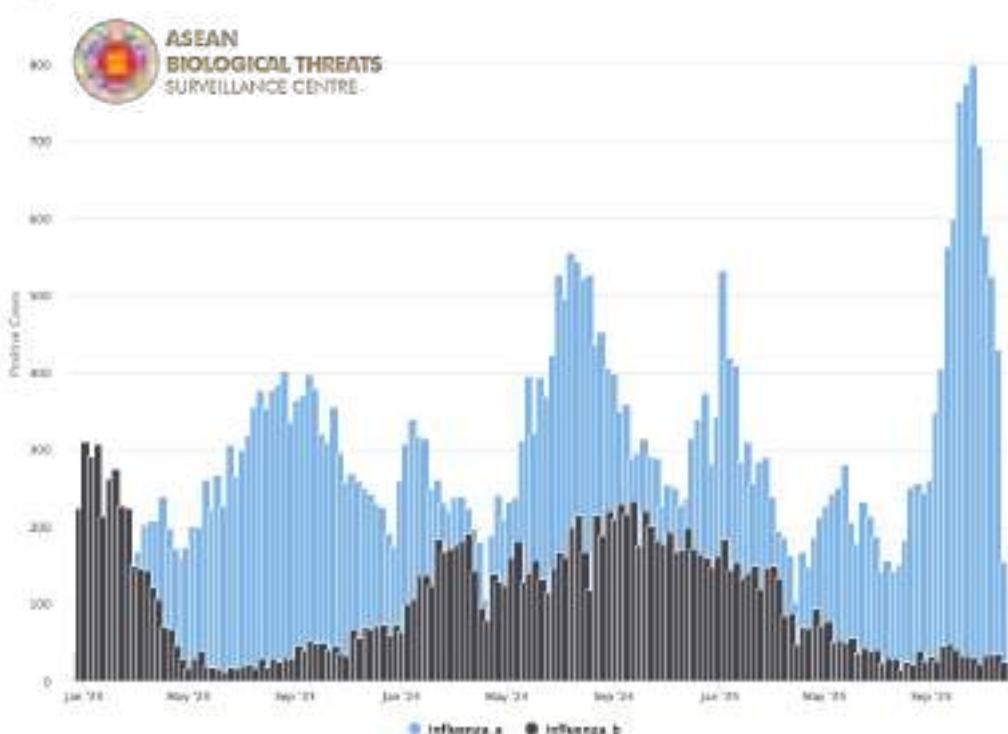

INFLUENZA

Key Findings

- Recently, most influenza cases among ASEAN Member States had decreased.
- Influenza-like illness (ILI) and severe acute respiratory infection (SARI) cases were increase among some ASEAN Member States.

- Data were updated and collected from official sources, which may have a 2-8 weeks delay in reporting. Data must be interpreted cautiously.

*Notified dengue cases only includes severe cases Dengue Hemorrhagic fever (DHF) and Dengue Shock Syndrome (DSS)

**Notified dengue cases only includes Dengue Fever (DF) and DHF

***Notified dengue cases include all type of cases DF, DHF, and DSS

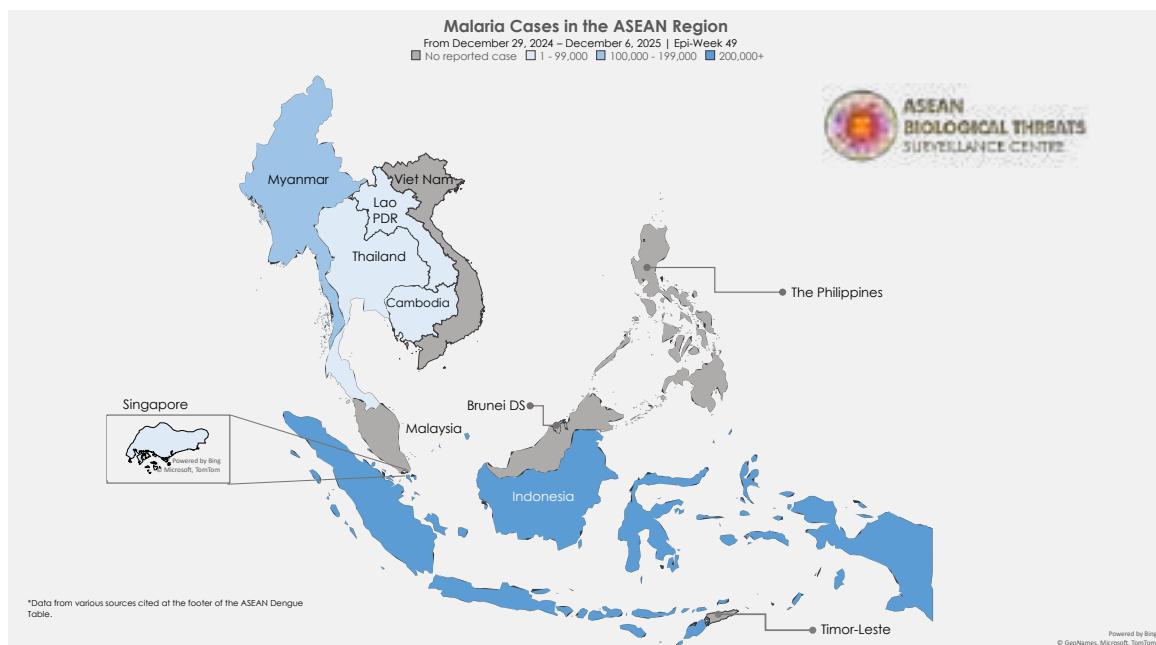

MALARIA

Malaria Cases in the ASEAN Region

From December 29, 2024 to December 6, 2025 (Epi-Week 49, 2025)

Key Findings

- The ASEAN region reported **14,923** new malaria cases in Epi-week 49, 2025.
- Up to December 6, 2025, the region reported **792,579** total cases and **104** deaths with **0.01%** CFR.

Malaria cases in the ASEAN region

Country	Epi-Week Reported	Cumulative Cases	New Cases Since Last Week	Cumulative Deaths	CFR
