Morbidity and Mortality Weekly Report (MMWR)

Infectious & Emerging Diseases
in the ASEAN Region

With Support by:

Korea Disease Control and
Prevention Agency

in partnership with
Canada

Kemenkes

ASSOCIATION
OF SOUTHEAST
ASIAN NATIONS

This report aims to provide the current situation on infectious and emerging diseases in the ASEAN Region. We collate various information from multiple official sources and publicly available sources and is published every week on Wednesday. ABVC follows Epi-week calendar in its publication. For feedback and/or suggestions, please write to support@aseanbiosurveillance.org

A person wearing a full-body white protective suit, including a hood and a face mask with a filter. They are wearing black gloves and holding a black cylindrical object in their right hand. The background is a dimly lit laboratory or clinical setting.

Emerging Diseases

MPOX

Mpox Cases Reported in the ASEAN Region

January 1, 2025 – March 14, 2026

Source:

1. Ministry of Health Cambodia
2. Ministry of Health Republic of Indonesia (<https://infeksiemerging.kemkes.go.id>)
3. WHO Mpox Outbreak: Global Trends, accessed March 17, 2026 (https://worldhealthorg.shinyapps.io/mpx_global/)
4. Communicable Disease Agency, Ministry of Health Singapore, accessed March 17, 2026, <https://www.cda.gov.sg/resources/weekly-infectious-diseases-bulletin-2025/>

Key Findings

- The number of Mpox cases from January 1 to March 14, 2026, are **21 cases with no deaths**.
- There were **no new cases of Mpox** in epi-week 10 of 2026.
- **57,158 confirmed cases** of mpox have been reported in **other regions** (other than the **ASEAN** region):

Mpox cases in the ASEAN region in 2025 and 2026 (as of 14 March, 2026)

ASEAN Member States	Cumulative Cases in 2025	Cumulative Deaths in 2025 (CFR)	Cumulative Cases in 2026	New Cases Since Previous Report	Cumulative Deaths in 2026 (CFR)
Cambodia¹	0	0 (0.00%)	0	0	0 (0.00%)

COVID-19

Key Findings

- Recently, the number of **confirmed COVID-19 cases reported to ASEAN are declining** compared to the previous year.
- The number of confirmed COVID-19 cases reported from 1 January 2026 to 14 March 2026 are **5,561 cases with 0% Case Fatality rate (CFR)**
- In February 2026, this week's genomic data from ASEAN countries show that SARS-CoV-2 circulation remains entirely within the Omicron family, with most countries dominated by **JN.1** or its monitored descendants (**KP.3, KP.3.1.1, LP.8.1, NB.1.8.1, XEC, XFG**) and no new variant of concern detected. **JN.1** or its descendants are now the leading groups in Indonesia, the Philippines, Laos, Singapore, Thailand, and Vietnam, while Brunei remains largely BA.*-driven and Myanmar continues to be dominated by **XBB.1.16** and related **XBB** lineages, indicating heterogeneous but broadly stable variant patterns across the region.

Zoonosis

RABIES

Key Findings

- The **ASEAN** region reported **three** new rabies case in Epi-week 10, 2026.
- The total number of rabies cases from January 1 to March 14, 2026 are **43** cases with **100%** CFR.

Rabies cases in the ASEAN region
