Emerging Diseases

A person wearing a full-body white protective suit, including a hood and a face mask with a filter. They are wearing black gloves and holding a small, clear tube or vial in their right hand. The background is dark and out of focus, suggesting a laboratory or clinical setting.

MPOX

Mpox Cases Reported in the ASEAN Region

January 1, 2023 – July 26, 2025

Source:

1. Ministry of Health Republic of Indonesia
2. Ministry of Health Singapore, accessed July 29, 2025, <https://www.moh.gov.sg/resources-statistics/infectious-disease-statistics/2023/weekly-infectious-diseases-bulletin>

Key Findings

- From 1 January 2023 to 26 July 2025, **67,545** confirmed cases worldwide since 2023, including **330** deaths. Globally, the CFR was **0.49 %**.
- **1,426 confirmed cases** including **27 deaths** in the **ASEAN** region, with a CFR of **1.89%**.
- **66,119 confirmed cases** of mpox have been reported in **other regions** (other than the **ASEAN** region):

Mpox cases in the ASEAN region (Jan. 1, 2023 to Jul. 26, 2025)

Distribution of Mpox Variants in The Global

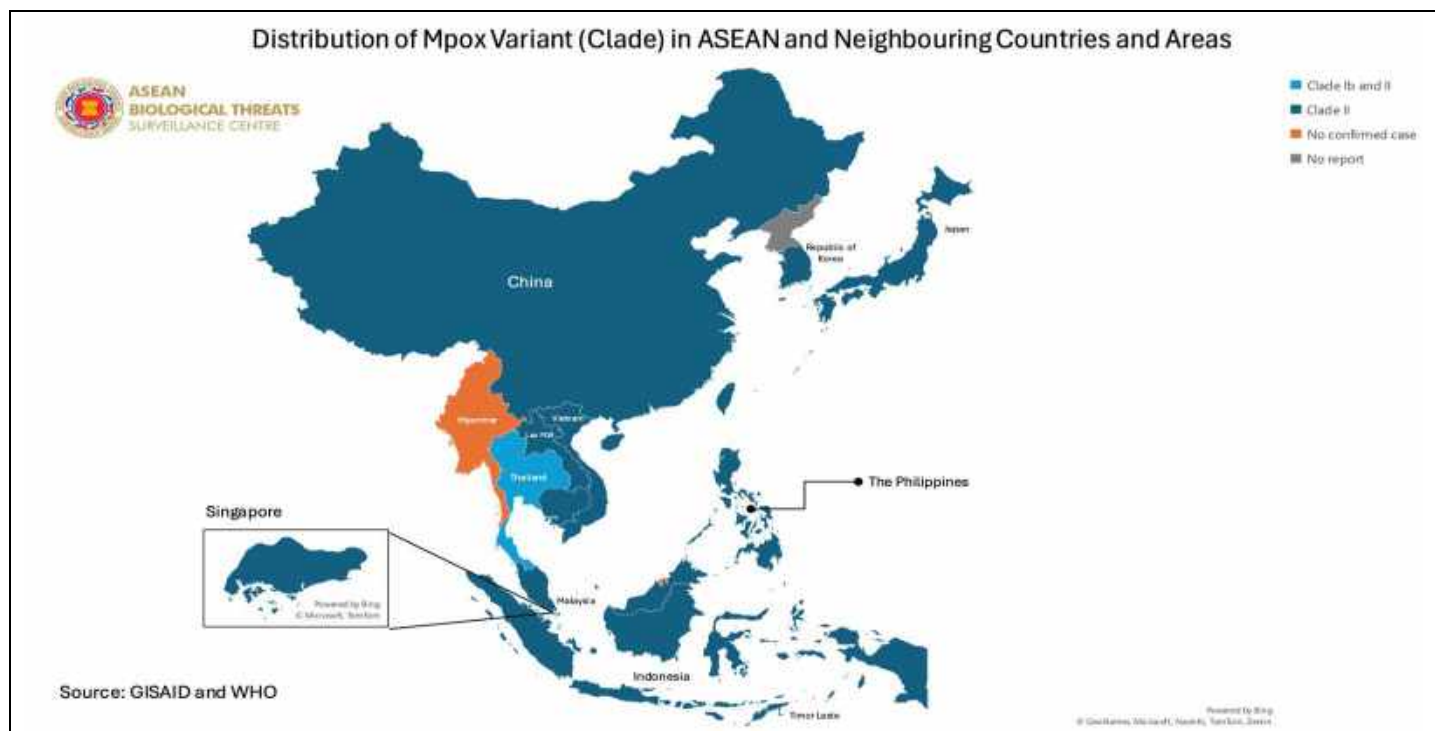

As of July 26, 2025

Distribution of Mpox Variant (Clade) in The Global

Source: GISAID and WHO

Distribution of Mpox Variants in the ASEAN and Neighbouring Countries and Areas As of July 26, 2025

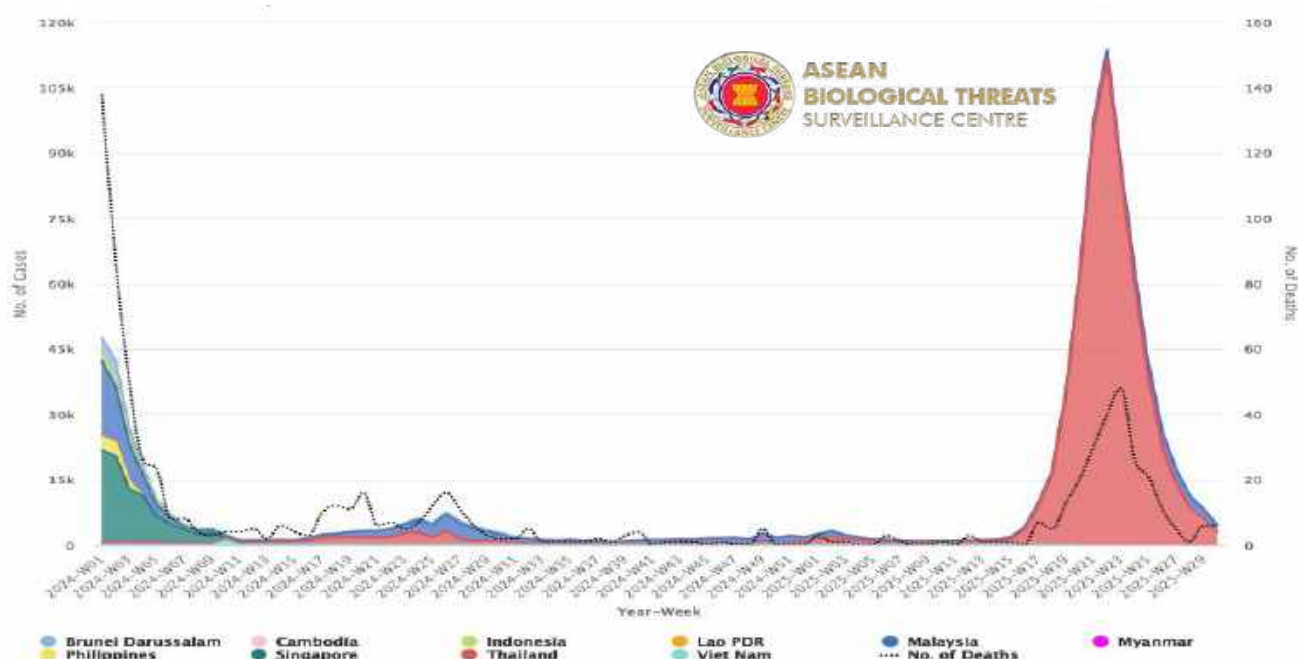

COVID-19

Key Findings

- As of 26 July 2025 (5PM, GMT+7), there were **778,338,164** confirmed cases **worldwide**, including **7,097,817** deaths. Globally, the Case Fatality Rate (CFR) was **0.91%**.
- 37,718,607 total confirmed cases** of COVID-19 have been reported in the **ASEAN Region**.
- The CFR in the **ASEAN Region** was **0.98%**.
- In July 2025, **NB.1.8.1** variant show a dominance number in Thailand and Vietnam. Meanwhile, Cambodia, Singapore and Malaysia show dominance in **Omicron B.1.1.529+BA.*** variant.

ASEAN Weekly COVID-19 Cases and Deaths

From January 1, 2024 to July 26, 2025

Sources: [Singapore Government](#), [MOH Indonesia](#), [MOH Cambodia](#), [DDC Thailand](#), [MOH Myanmar](#), [MOH Malaysia](#), and [WHO](#) accessed on July 29, 2025

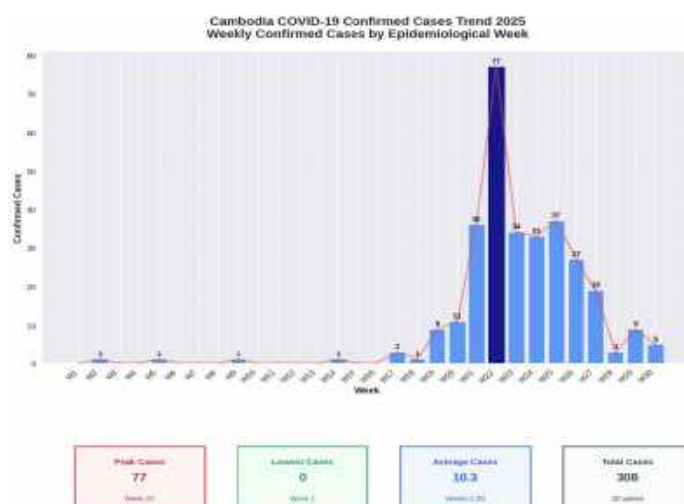

- A major peak in case numbers occurred in mid-2025 until week 22 as the highest peak of the cases reported. Meanwhile, after week 23, the cases started to decrease significantly until the week of 30.

ASEAN Weekly COVID-19 Cases among ASEAN Member States

From January 1 to July 26, 2025

Cambodia:

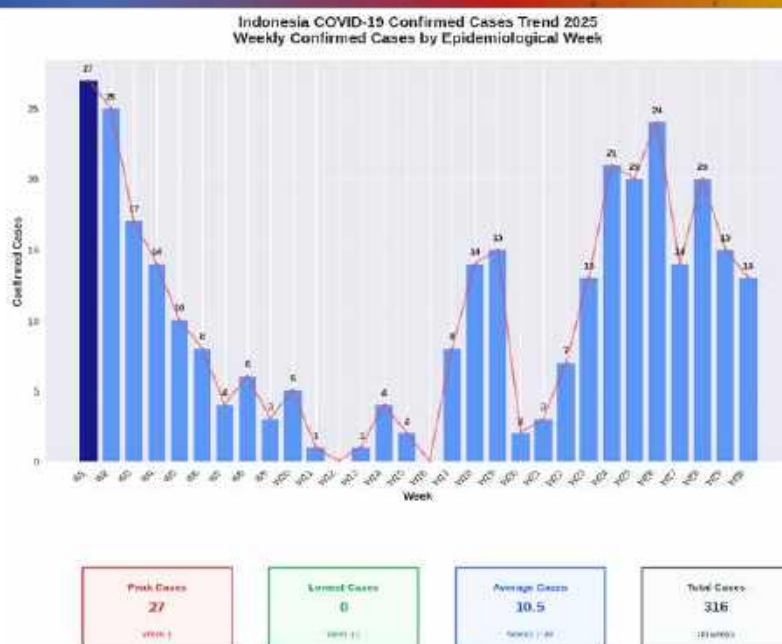

- COVID-19 cases in Cambodia remained very low from Week 1 to Week 16 of 2025, with most weeks reporting zero or one case.
- A noticeable increase in weekly cases began in Week 19, rising sharply to 77 cases by Week 22.
- No deaths were reported throughout the 30-week period, suggesting mild disease or effective healthcare response.

Source: [MOH Cambodia](#), accessed on July 29, 2025

Indonesia:

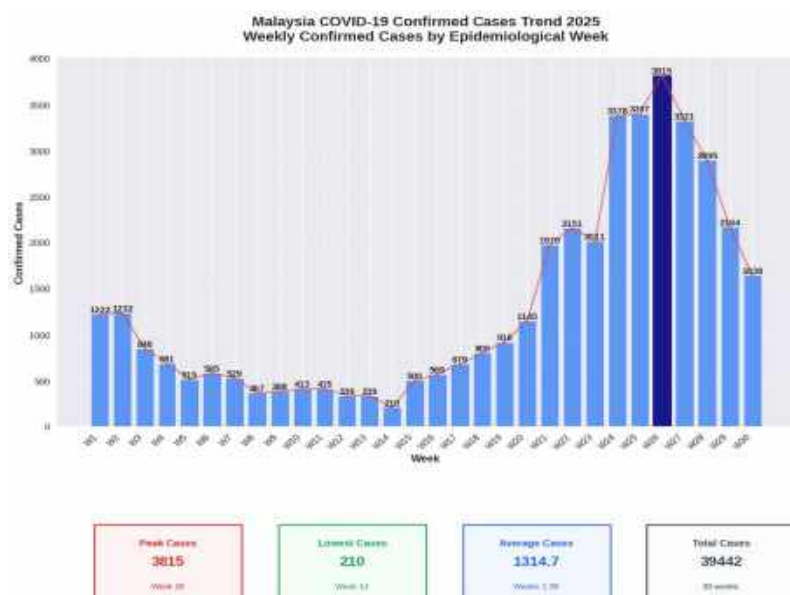

- Indonesia demonstrated effective pandemic control with cases declining from a peak of 27 in week 1 to near-zero levels by weeks 12-16, indicating successful implementation of public health measures early in 2025.
- The overall trend shows a well-managed outbreak with an average of only 9.2 cases per week, and zero deaths reported throughout the 27-week period, suggesting robust healthcare system response and disease surveillance.
- There was a brief increase in cases during weeks 17-19 (reaching 15 cases) that are likely happening during 22-26.

Source: [MOH Indonesia](#), accessed on July 29, 2025

Malaysia:

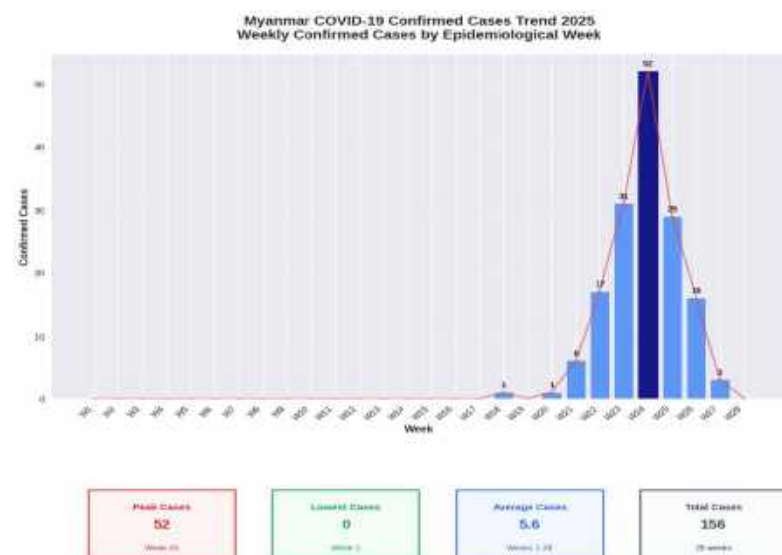

- U-shaped trend: Cases started high (1,222-1,232), dropped significantly to a minimum of 210 cases in week 14, then surged dramatically to peak at 2,151 cases by week 22.
- Accelerating growth phase: The resurgence from week 15 onwards shows exponential growth, with cases more than quadrupling in just 8 weeks (500 to 2,151).
- Very low mortality: Despite more than 35 thousand total cases across 30 weeks, two deaths were recorded, suggesting either effective treatment protocols or a less severe variant.

Source: [MOH Malaysia](#), accessed on July 29, 2025

Myanmar:

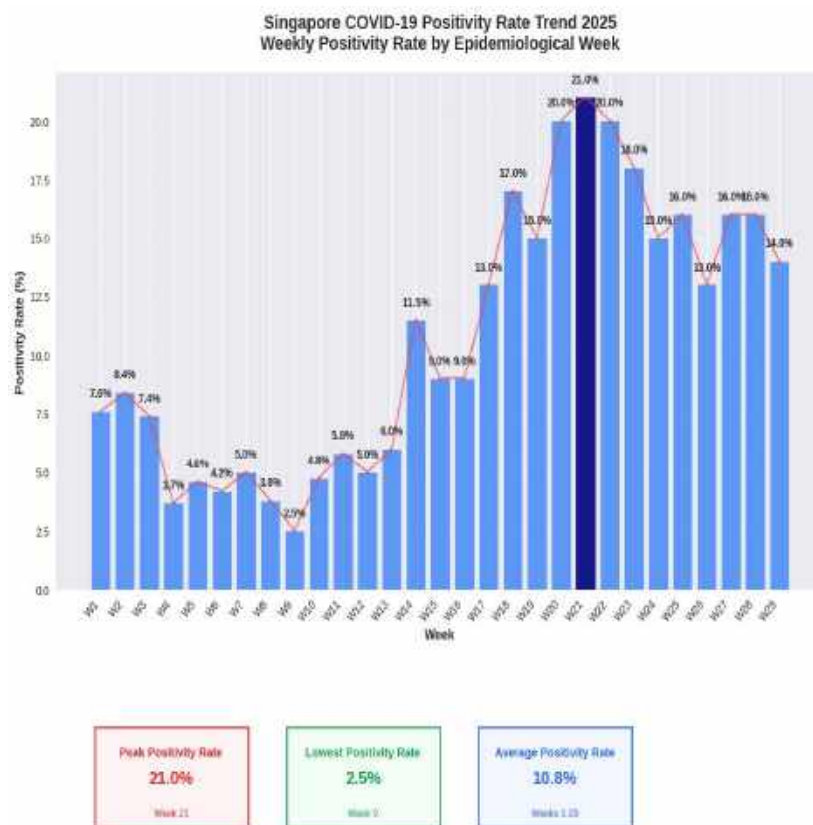

- The total number of COVID-19 cases reported in Myanmar for the week's analyzed in 2025 was 156.
- On average, Myanmar reported five COVID-19 cases per week during this period.
- The peak number cases were reported in week 24 with more than 50 cases. Meanwhile, the lowest reported cases occurred in the earliest week this year from week 1 to week 17. During these weeks, Myanmar reported no cases on COVID-19.

Source: [MOH Myanmar](#), accessed on July 29, 2025

Singapore:

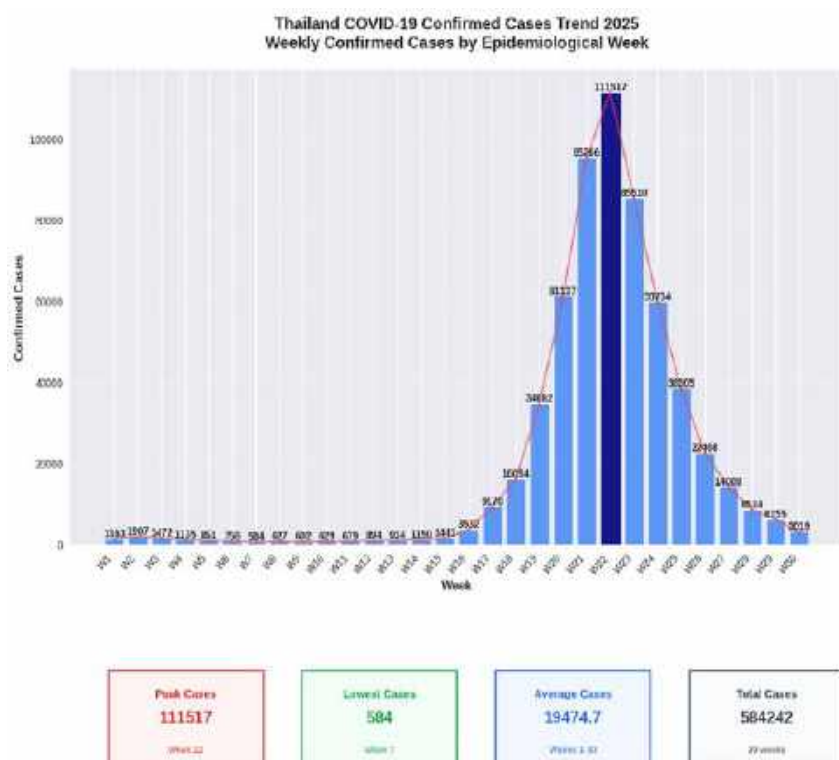

- Based on the last press release by Minister of Health of Singapore on May 13, 2025. The estimated number of COVID-19 cases in the week of 27 April to 3 May 2025 rose to 14,200 cases, compared to 11,100 cases in the previous week.
- At present, LF.7 and NB.1.8 (both descendants of the JN.1 variant) are the main COVID-19 variants circulating in Singapore, together accounting for more than two-thirds of locally sequenced cases.
- From the ILI/SARI Singapore sentinel data, Compared to week 21, trend showing fluctuated up to week 30.

Source: [Singapore Government](#), accessed on July 29, 2025

Thailand:

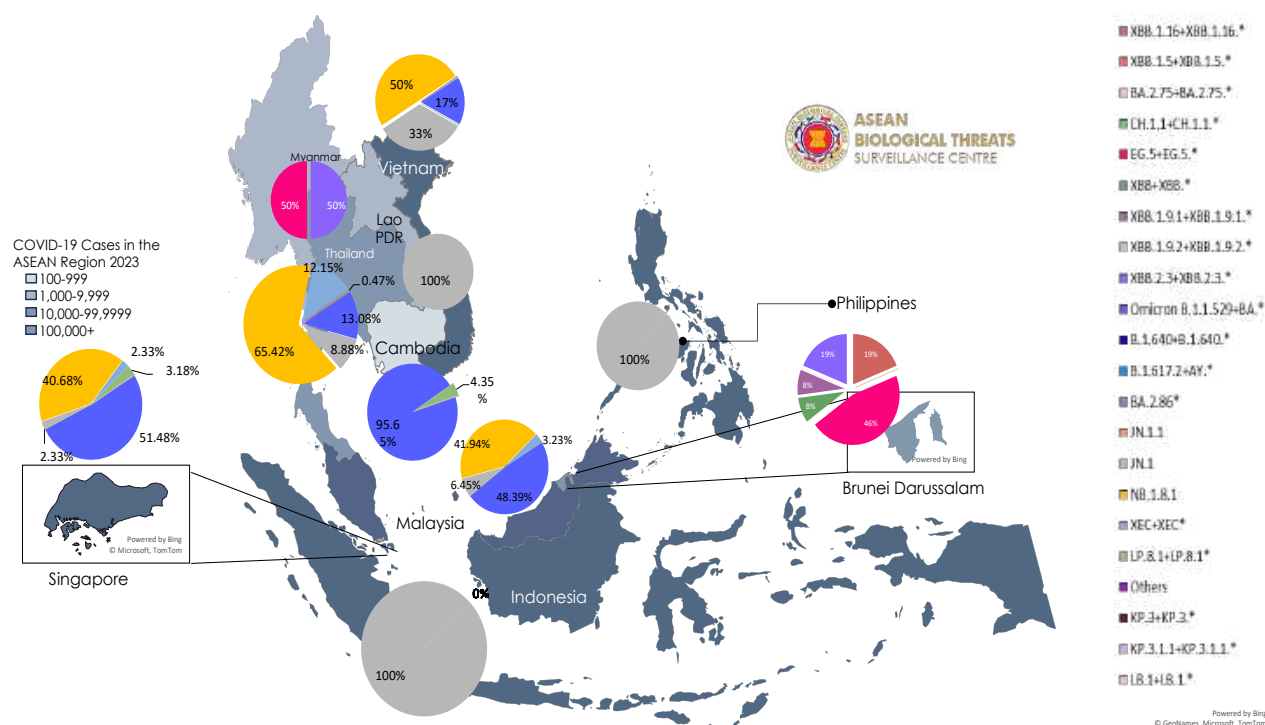

- Early Phase (W1-W15): Sporadic and low case counts with intermittent deaths.
- Acceleration Phase (W16-W21): Rapid, exponential rise in cases indicates a shift to widespread community transmission, potentially due to mass gatherings.
- Week 22 now represents the absolute peak of Thailand's COVID-19, with the highest case count more than 100,000 cases.
- After the week 23, the cases significantly decrease until week 30.

Zoonosis

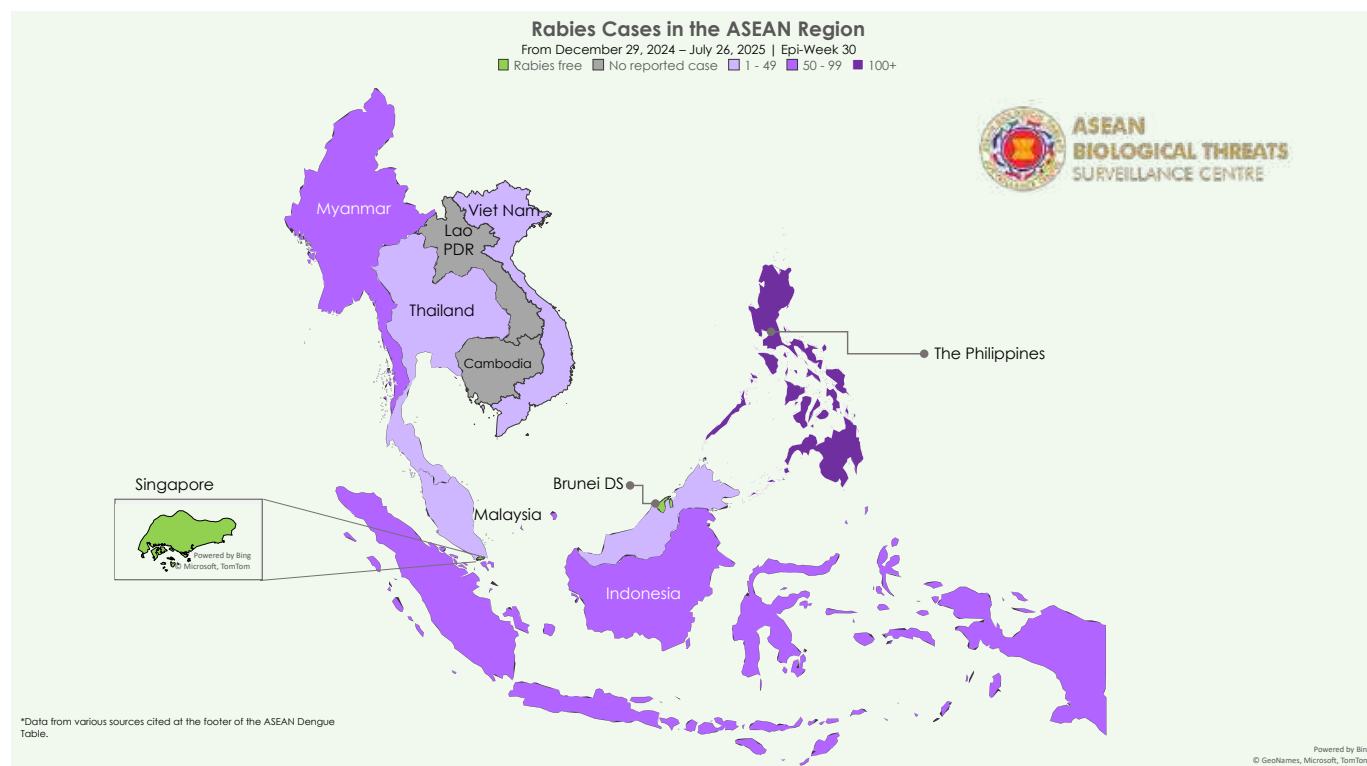

RABIES

Rabies Cases in the ASEAN Region

From December 29, 2024 to July 26, 2025 (Epi-Week 30, 2025)

Key Findings

- The **ASEAN** region reported **no** new rabies cases in Epiweek 30, 2025.
- Up to July 26, 2025, the region reported **323** total cases with **100%** CFR.

Rabies cases in the ASEAN region

Country	Epi-Week Reported	Cumulative Cases	New Cases Since Previous Report	Cumulative Deaths	CFR
Brunei Darussalam			Rabies-free country		
Cambodia	-	-	-	-	-
Indonesia¹	Week 29	87	-	87	100%

Vector-Borne Diseases

DENGUE

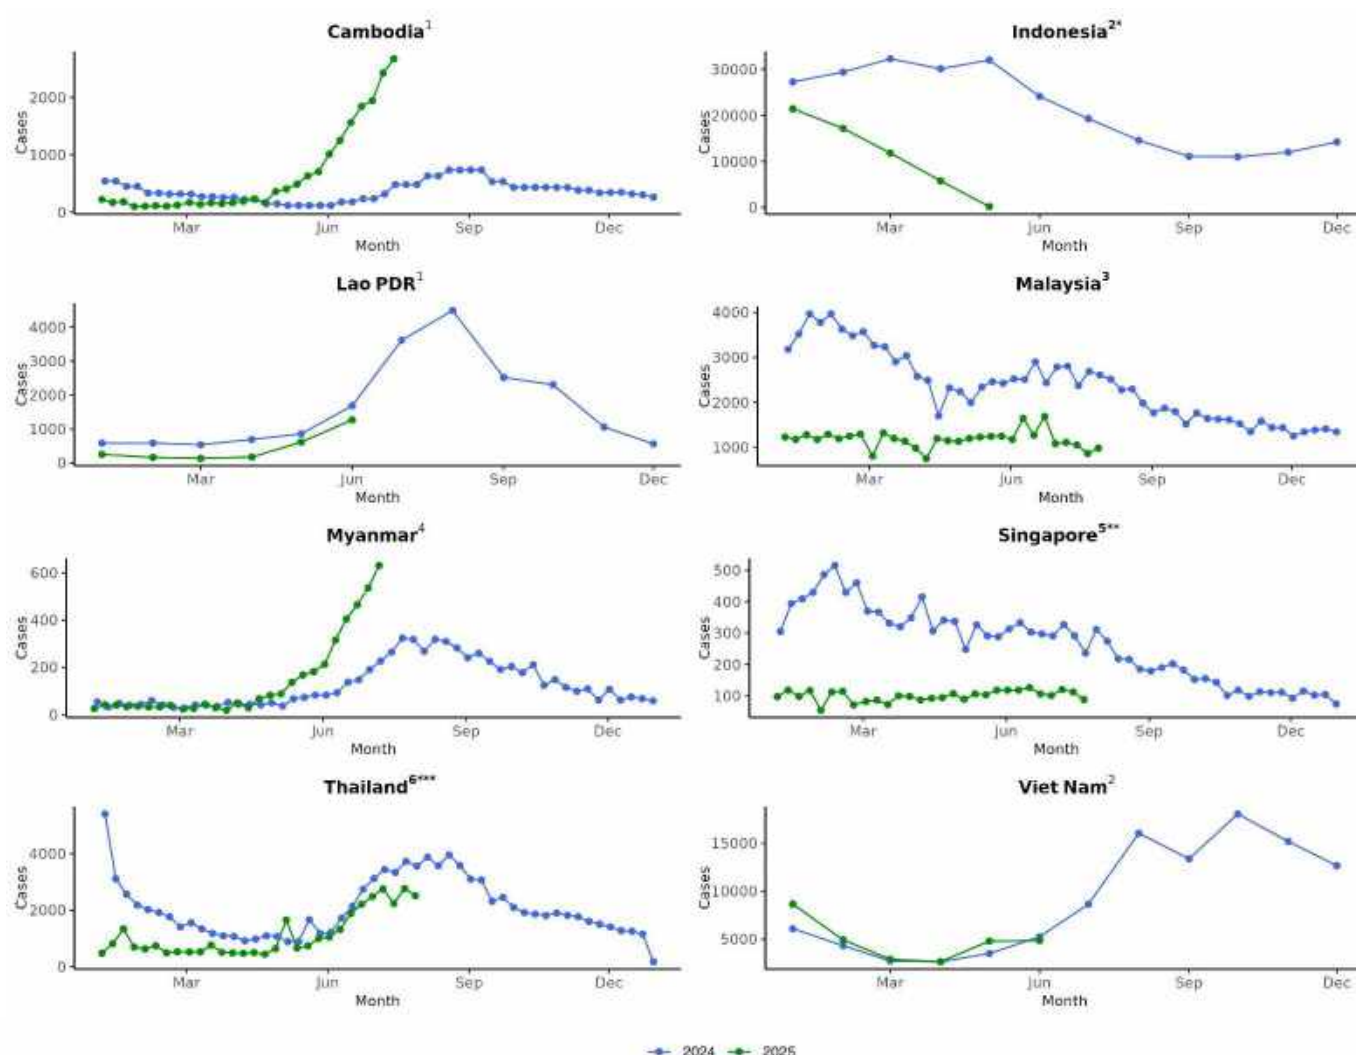

Dengue Cases in the ASEAN Region

From December 29, 2024 to July 26, 2025 (Epi-Week 30, 2025)

Key Findings

- The **ASEAN** region reported **12,383** new dengue cases in Epiweek 30, 2025.
- Up to July 26, 2025, the region reported **181,256** total cases and **297** total deaths with **0.16% CFR**.
- Most dengue trends in 2025 among AMS showing lower number of cases compared to previous year at the same period. Cambodia and Myanmar are showing an increasing trend in cases compared to the previous year.

- Data were updated and collected from official sources, which may have a 2-8 weeks delay in reporting. Data must be interpreted cautiously.

*Notified dengue cases only includes severe cases Dengue Hemorrhagic fever (DHF) and Dengue Shock Syndrome (DSS)

**Notified dengue cases only includes Dengue Fever (DF) and DHF

***Notified dengue cases include all type of cases DF, DHF, and DSS

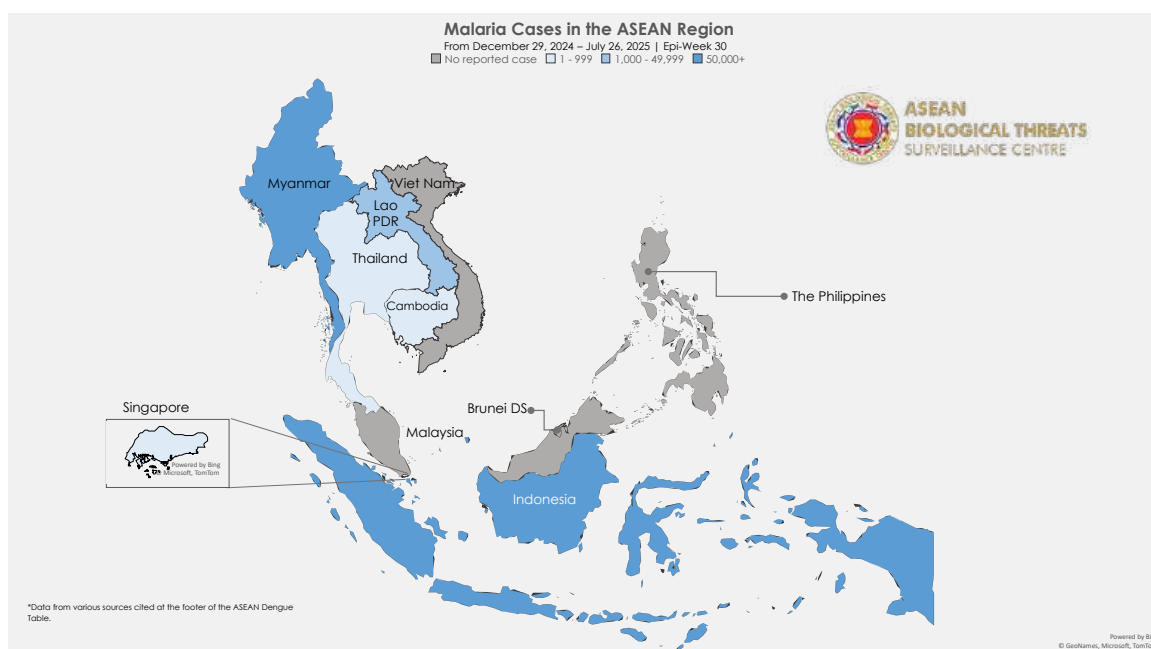

MALARIA

Malaria Cases in the ASEAN Region

From December 29, 2024 to July 26, 2025 (Epi-Week 30, 2025)

Key Findings

- The **ASEAN** region reported **17,719** new malaria cases in Epiweek 30, 2025.
- Up to July 26, 2025, the region reported **439,835** total cases and **77** deaths with **0.02%** CFR.

Malaria cases in the ASEAN region

Country	Epi-Week Reported	Cumulative Cases	New Cases Since Last Week	Cumulative Deaths	CFR
