

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of October 2, 2020 (2:00 PM GMT+8)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 34.3 million cases and more than 1.02 million deaths attributed to COVID-19.
- On October 1, the Philippines entered the list of 20 countries with the most number of COVID-19 cases worldwide after the country reported 2,415 new cases and bringing the total number of cases to 314,079. Despite the high tally, the government highlighted that out of the over 314,000 cases, only 17% or 54,294 are active cases. The Department of Health also cited that the country's health system capacity has tremendously improved in response to this pandemic.
- Thailand has reported 5 new cases on October 1, bringing the country's total COVID-19 cases to 3,569. Disease activity has remained low since May. However, on September 28, the government extended, for the sixth time, the country's state of emergency until October 31, which was originally imposed on March 26. The state of emergency allows the government to implement mandatory quarantine orders and manage other outbreak control measures without public approval, despite restrictions being eased in many areas since May. The extension was implemented considering the government's plan to reopen parts of the country's tourism economy, with the first foreign tourist groups expected to arrive in Phuket from October 8, followed by European visitors in November. Authorities eased entry restrictions for foreigners on August 4. Those entering the country must follow health protocols as well as a 14-day quarantine period at designated facilities.
- Vietnam has reported 1 new case on October 1, bringing the total number of COVID-19 cases in the country to 1,095. The country experienced a sustained downward trend in August; however, more recently, a small increase was noted. During the month of September, the country reported fewer than 5 cases per day and on September 29, 17 cases were reported in returning travellers from Russia, representing the highest number since August 15, when 21 cases were reported. When Vietnam recorded its first case in January, the country immediately began strict measures in order to contain the outbreak which included closing its borders, imposing lockdowns, setting up quarantine facilities, and carrying out rigorous contact tracing including testing through apps and keeping track of second, third, and fourth levels of contact of infected persons. Although the country has been praised for its response, it still faces challenges such as its porous borders with China, Laos, and Cambodia. Vietnam has gone 28 days without recording a locally transmitted case.
- The number of cases reported daily in Malaysia has been resurging since early September. In response, authorities announced on September 28 that strict movement restrictions will be imposed until October 12 in four districts in Sabah, including Lahad Datu, Tawau, Kunak, and Semporna, where infection rates are the highest. Under the new restrictions, termed a Targeted Enhanced Movement Control Order (TEMCO), non-essential businesses are required to close, and movement in and out of the affected districts is prohibited. According to officials, recent outbreaks are from a cluster in Sabah state on Malaysian Borneo, where two undocumented migrants were infected. The remaining cases were detected in a new cluster in the northern state of Kedah as well as among six arrivals from Turkey, Bangladesh, Indonesia, and Egypt. As of October 1, Malaysia has reported 260 new cases, bringing the total number of COVID-19 cases in the country to 11,484.

- In Myanmar, sCOVID-19 cases have been rising quickly over the past month: the seven-day rolling average for the number of new cases reported per day has increased from 59 as of September 1 to 812 as of September 29. In September, 93% of the country's cumulative cases were reported: 11,543 of the 12,425 cumulative cases were reported since September 1. As of October 1, the country reported 1,010 new cases, bringing the total COVID-19 cases in the country to 14,383. Since the beginning of the outbreak, the testing rate has been declining over the past two weeks from a moderate rate (405 tests per 100,000 people) to only 28 tests per 100,000 people recently. The proportion of positive tests has been very high over the past two weeks (59.4%), up from approximately 5-6% when testing rates were higher. The moderate testing rate and a high proportion of positive tests over the past 14 days indicates a larger outbreak is underway than official data suggest, and indicate a limited ability to control transmission. Media sources report that Myanmar has isolated cases and quarantined tens of thousands of people to prevent the spread of the virus, including those waiting to be tested, their close contacts, and returning migrant workers, in buildings from schools and monasteries to government offices and tower blocks. These sites are mostly run by volunteers. In Yangon, Myanmar's largest city, seven new quarantine centres have been built to accommodate 1,000 people as cases continue to rise in the city. Additionally, as of September 21, residents are under stay-at-home orders until October 7 with the exception of those working in certain industries or shopping for food or medical supplies. Domestic travel outside of the city is forbidden and there is currently a ban on international flights until the end of October. Concerns have been raised regarding the possible need to postpone the national elections scheduled for November 8 if cases continue to rise in the country.
- The Jakarta administration will impose controlled isolation for asymptomatic COVID-19 patients in order to reduce COVID-19 transmission as the number of cases continues to rise. Jakarta Health Agency head said the appointed locations to accommodate the asymptomatic patients included public facilities such as the former athletes village in Kemayoran— now an emergency hospital for COVID-19 patients in Central Jakarta, as well as self-isolation centers in the capital city including hotels and private facilities for self-isolation at home. The government is currently preparing other locations for controlled isolation, such as the Jakarta Islamic Center in North Jakarta, Graha Wisata at Taman Mini Indonesia Indah in East Jakarta, and Graha Wisata Ragunan at Jaya Raya Ragunan Sports Center in South Jakarta. The Health Ministry reported 4,174 new confirmed COVID-19 cases on Thursday (September 1), bringing the total number of cases in the country to 291,182.

Travel Advisories (new update/s)

- Singapore: Singapore will unilaterally lift border restrictions to visitors from Australia (excluding Victoria state) and Vietnam from October 8. The Civil Aviation Authority of Singapore (CAAS) said on Wednesday that these two countries both have comprehensive public health surveillance systems and have successfully controlled the spread of the COVID-19 outbreak. Visitors from Australia and Vietnam will be able to apply for the Air Travel Pass for entry into Singapore starting October 1.

Cases and Deaths as of 01 October 2020

- As of October 01 (2PM, GMT+8), worldwide, there were **34,458,923** confirmed cases, including **1,023,671** deaths. Globally, Case Fatality Rate (CFR) is **2.97**.
- In **China**, there were **91,119** confirmed cases with **4,746** deaths, including deaths in Hong Kong (105) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (5,098), Macau (92), and Taiwan (515).
- 694,024 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **16,999 deaths**.
