

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of July 3, 2020 (2:00 PM GMT+8)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been more than 10.8 million cases, and over 520,000 deaths attributed to COVID-19. The World Health Organization has warned that the Eastern Mediterranean region, which includes the Middle East, is at a "critical threshold" as the number of confirmed cases continues to rise. The pandemic is also picking up speed in Africa with over 400,000 total cases and 10,000 deaths reported within the continent.
- World Health Organization (WHO) has updated the interim guidance on infection prevention and control during healthcare when coronavirus disease (COVID-19) is suspected or confirmed. This is the third edition of the guidance and expands the scope and structure of earlier guidance, bringing together other interim recommendations as well as considerations and advice from subject matter experts. This guidance is intended for health workers, including healthcare managers and IPC teams at the facility level, but it is also relevant for the national and district/provincial levels.
- Jakarta Governor has announced that the capital is extending its transitional COVID-19 mobility restrictions by 14 days and tightening supervision of traditional markets and train services. The city administration had decided to keep its large-scale social restrictions (PSBB) in place until July 15 after reviewing the situation of the pandemic in the capital with the COVID-19 task force. As of July 2, the Health Ministry announced 1,624 new confirmed COVID-19 cases, bringing the total number of infections nationwide to 59,394.
- Brunei reported no new cases of COVID-19 for 57 consecutive days and with total cases remaining at 141. According to Brunei's Minister of Health, there are no active cases being treated at the National Isolation Center anymore.
- Lao Ministry of Health reported no new cases of COVID-19 for 81 consecutive days with total cases remaining at 19. Laos announced its first two COVID-19 confirmed cases on March 24, and the last patient was discharged on June 9.
- In Malaysia, one of three new cases detected on Thursday (July 2) was under quarantine and was linked to Bukit Bintang cluster. According to the Health Director-General, the latest new positive case was detected from a repeat test conducted on those still in quarantine. These individuals remain isolated and therefore there is no risk of them infecting others in the community. This case is one out of three new cases in the country. With the one additional case, there are now 11 positive cases linked to this cluster. As of July 2, total number of cases nationwide is 8,643.
- The Philippine government announced today (July 3) that the country is boosting COVID-19 testing efforts to now include people who not showing flu-like symptoms. Authorities have set the goal of testing one million people by the end of July. National government data showed the country has already conducted over 738,000 coronavirus tests.
- According to Singapore's Health Minister on July 2, the increase in the average number of new COVID-19 cases in the community per day is "not unexpected". The number of new cases in the community has increased from an average of four cases per day in the week before to an average of eight cases a day in the past week. According to the minister, among the community cases in the past two weeks, the majority were picked up from active surveillance and screening.
- Beijing's Municipal Health Commission reported two new confirmed domestically transmitted COVID-19 cases on Thursday (July 2). According to

the commission, Beijing reported 331 confirmed locally transmitted cases from June 11 to July 2 where 324 of whom were still hospitalized.

- South Korea reported 63 new coronavirus cases as of Thursday (Jul 2), most from domestic infections outside Seoul. The spike in cases activated the return of tighter social distancing curbs in one city as the spectra of a second wave of the disease worried authorities. For the first time in almost two months, new daily cases from other cities surpassed those from Seoul area. The southwestern city of Gwangju has recorded more than 50 cases the past few days, prompting the suspension of operations of public facilities such as public libraries and museums.
- According to a government spokesperson, Japan will not reintroduce a state of emergency to tackle COVID-19. It was stated that the rise is partly due to increased testing among nightlife workers in the Shinjuku and Ikebukuro districts. But despite the spike, according to the spokesperson, the number of serious cases is declining and there was no need to reinstate the state of emergency that was lifted on May 25.

Travel Advisories (new update/s)

- Thailand: Thailand's Tourism and Sports Minister on July 3, says foreign tourists will be allowed back into the Kingdom in August under a 3 phase "travel bubble" strategy, which will include countries who are considered at a low-risk for COVID-19 and will be allowed to travel on specific routes or itineraries "booked through small agencies." After discussions with the Tourism Authority of Thailand and private tourism operators, the minister met with Public Health Ministry officials to finalize the list of travel bubble countries, which will be proposed to the Center for COVID-19 Situation Administration within the next 2 weeks.

Cases and Deaths as of 03 July 2020

- As of July 03 (2PM, GMT+8), worldwide, there were **10,861,947** confirmed cases, including **520,138** deaths. Globally, Case Fatality Ratio (CFR)* is **4.79**.
- In **China**, there were **85,274** confirmed cases with **4,648** deaths, including deaths in Hong Kong (7) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (1,243), Macau (46), and Taiwan (446).
- **10,0776,673 confirmed cases** of COVID-19 have been reported in **212 countries/states** (other than China, Hong Kong, Taiwan and Macau):
