

# Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of September 7, 2020 (2:00 PM GMT+8)

## COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 27.2 million cases and more than 886,000 deaths attributed to COVID-19. India overtook Brazil on Monday to become the second-worst affected country in terms of COVID-19 cases, next to United States. The nation has recorded 4.20 million infections since the pandemic began, health ministry data showed, compared with 4.12 million in Brazil and 6.25 million in the US. Since August the country of 1.3 billion people, home to some of the world's most densely populated cities, has been reporting the highest single-day rises in the world. On Monday it reported an increase of more than 90,000 cases. Its caseload moved past four million on Saturday, only 13 days after hitting three million. Over the past two weeks, the average has moved from about 65,000 cases per day to about 83,000 cases per day, that is about a 27% increase over two weeks or about 2% per day. The Indian Council of Medical Research, the scientific agency leading the government's response, on Friday revised the testing criteria, allowing anyone to undergo a test without a doctor's letter. This will uncover more asymptomatic people in India.
- China National Biotec Group (CNBG) and Sinovac Biotech Ltd said on Saturday (September 5) four more countries have agreed to run late-stage human tests of their coronavirus vaccine candidates, as China steps up its efforts in the global race. Serbia and Pakistan are among the new countries agreeing to Phase 3 trials, as Chinese companies seek more data overseas for final approvals of potential vaccines. China has allowed two vaccine candidates from CNBG and one from Sinovac to be used in limited groups of people facing high infection risk, such as medical workers. Sinovac's vaccine candidate CoronaVac, being trialed in Brazil and Indonesia, has obtained approvals from two other countries for Phase 3 tests.
- In Singapore, new COVID-19 clusters were identified on Sunday (Sep 6) at three migrant worker dormitories that were previously cleared of the coronavirus, with a community case being linked to one of the clusters. The Ministry of Health (MOH) reported on Sunday that new clusters have emerged at Cassia Penjuru, CDPL Tuas Dormitory and Kranji Lodge. All these three dormitories had been gazetted as isolation areas in April under the Infectious Diseases Act before they were declared cleared of COVID-19 last month.
- Phangnga has become Thailand's first province to re-impose strict health measures following news of the first local COVID-19 transmission case in more than three months and the outbreak in neighboring Myanmar. Among the measures is a required 14-day home quarantine for those arriving in, or returning to, the southern province from areas considered COVID-19 outbreak zones. The stay-at-home requirement is being waived if people can show proof of having quarantined at a state or local quarantine facility before arriving in the province.

### Travel Advisories (new update/s)

- Thailand: The government's plan to reopen the resort island of Phuket as a model to welcome back foreign visitors has been put on hold after the country last week saw the first case of local Covid-19 infection in more than three months. Tourism Authority of Thailand (TAT), said the launch of the so-called "Phuket model" scheduled for next month as part of efforts to revive the local economy, is likely to be pushed back.

- Vietnam: All passenger transport services including planes, buses, and trains to and from Da Nang resumed operations starting today (September 7). However, passengers will have to follow health measures including wearing face masks and declaring health status.

### Cases and Deaths as of 07 September 2020

- As of September 07 (2PM, GMT+8), worldwide, there were **27,273,189** confirmed cases, including **887,250** deaths. Globally, Case Fatality Rate (CFR) is **3.25**. (Data from Insights)
- In **China**, there were **90,523** confirmed cases with **4,734** deaths, including deaths in Hong Kong (93) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (4,871), Macau (92), and Taiwan (493). (Data from COVID Data Suite)
- **504,228 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **12,159 deaths**.
