COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 19.9 million reported cases, and more than 732,000 deaths attributed to COVID-19. Since the 1st confirmed COVID-19 case in the Region of the Americas (21 January 2020), there have been more than 10.1 million cumulative cases, including over 360,000 COVID-19 associated deaths. The Region of the Americas has become a worldwide hotspot. According to an official report from the Pan American Health Organization (PAHO), between July 2 - August 2, there was a 77% increase in the number of cases and a 42% increase in the number of deaths in comparison to the period beginning with the first reported case on January 21 until July 1. The largest relative increases in cases and deaths have occurred in the subregions of Central America (130% increase in cases and 142% increase in deaths), followed by the Caribbean and Atlantic Ocean Islands (98% increase in cases and 48% increase in deaths), and South America (82% increase in cases and 67% increase in deaths). Between July 2 - August 2, the highest proportions of new cases have been reported in the Bahamas (476%), Costa Rica (385%), the United States (US) Virgin Islands (376%), and Saint Pierre and Miquelon (300%), while the highest proportions of new deaths were reported in Costa Rica (863%), Venezuela (213%), and Colombia (198%). Furthermore, seven countries and territories have observed an increase in their transmission scenarios, with Costa Rica, Sint Maarten, Suriname, and the US Virgin Islands reporting community transmission for the first time. Trinidad and Tobago have reported clusters of cases, from previously seeing sporadic cases, while Bonaire, Sint Eustatius, and Saba Islands, and Saint Pierre and Miquelon Islands have reported their first sporadic cases since the beginning of the global pandemic.
- The World Health Organization (WHO) has published guidance on the public health surveillance of coronavirus disease 2019 (COVID-19) in humans caused by infection with severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). This document combines and supersedes the Global surveillance guidance for COVID-19 caused by human infection with COVID-19 virus: Interim guidance, and Surveillance strategies for COVID-19 human infection: Interim Guidance 10 May 2020.
- Brunei reported one new case of COVID-19 on Friday (August 7), breaking the 92-day record without new cases since May 7 and bringing the national total number of COVID-19 cases to 142. According to Brunei's Ministry of Health, Case 142 is a 24 years old local male who studied in Yemen and returned to Brunei on August 5 via Kuala Lumpur. Although reportedly suffered from shortness of breath on August 6, he is currently in a stable condition and is being treated at the National Isolation Center.
- A notice issued by the Prime Minister's Office suggests that Laos could enter into bilateral Fast-Track immigration policies with Vietnam and China. The notice, which began circulating on August 7, states that the risks and challenges of COVID-19 remain steep and that a second wave could occur at any time and without warning due to continual outbreaks among neighboring countries and around the world. The notice stresses the need for the Ministry of Public Security to ensure its immigration officials strictly carry out their duties in border control and enforcement, and that individuals found illegally entering the country must be tested for COVID-19 prior to being sent for quarantine in a government-designated location, and that the local population must be informed when such illegal entry occurs. It was stipulated in the notice that

police in Vientiane Capital and all provinces have been instructed to redouble efforts to ensure that entertainment venues and karaoke bars remain closed. notice suggests that the Ministry of Foreign Affairs should coordinate with the National Taskforce for COVID-19 Prevention and Control and other relevant agencies to continue to prepare for the implementation of a Fast-Track immigration policy with Vietnam and China. The Fast-Track immigration policy discussed in the notice refers to bilateral legislation that would allow certain privileges for individuals such as diplomatic staff, technical experts, and foreign labor for special projects, in relation to entry and exit procedures, namely that the 14-day quarantine period would be waived. At present, the new policy is being deliberated with the countries of Vietnam and China and remains under consideration.

- Singapore has continued a downward trend in new cases weekly, averaging between 200 and 400 cases per day with occasional spikes since reporting a peak on April 20 with 1,420 cases within 24 hours. Over 90% of the cases reported by Singapore have occurred among migrant workers living in dormitory settings. According to health authorities, the number of new cases in Singapore could be further reduced once the remaining 9,700 people who are in quarantine due to close contact with positive cases are tested. This week, the country will begin an early-stage clinical trial for a vaccine, which officials estimate may be widely available within 1 to 2 years if trials are successful.

Travel Advisories (new update/s)

- Laos: A notice issued on August 7 by the Prime Minister's Office Laos indicates that Laos would possibly enter into bilateral Fast-Track immigration policies with Vietnam and China.

Cases and Deaths as of 10 August 2020

- As of August 10 (2PM, GMT+8), worldwide, there were **19,917,800** confirmed cases, including **732,115** deaths. Globally, Case Fatality Ratio (CFR)* is **3.68.**
- In **China**, there were **89,153** confirmed cases with **4,688** deaths, including deaths in Hong Kong (45) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (4,008), Macau (46), and Taiwan (480).
- **324,458 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **8,223 deaths**
