

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 106.8 million cases and more than 2.3 million deaths attributed to COVID-19.
- The team from the World Health Organization (WHO) left China on Wednesday (February 10) after gaining some new insights into the origins of the COVID-19 pandemic. The mission to Wuhan did not change a major theory about where the virus came from. Scientists think bats are the most likely carriers, and that they passed it on to another animal, which passed it on to humans. At the WHO mission's closing news conference on Tuesday, one team member said some of these animals have been traced to farms or traders in regions that are home to bats that carry the virus that is the closest known relative of the one that causes COVID-19. The conclusion of the Chinese and international experts was that it is extremely unlikely the virus leaked from the Wuhan Institute of Virology. The WHO team leader said that the team also reviewed safety protocols at the institute, leading the team to conclude "it was very unlikely that anything could escape from such a place".

Vaccine Update

- Thailand announced plans on Thursday (February 11) to inoculate 1 million of its most vulnerable people against COVID-19 by May and start mass vaccinations in June, with the aim of administering 10 million doses a month. A senior health official said that Thailand is planning its vaccination programme in two phases: February to May and June to December. The first four months will be used to administer 2 million doses of the Sinovac Biotech vaccine, which are due to arrive this month. In the second phase, between June and December, authorities plan to administer 10 million doses monthly until December, using 61 million doses of the AstraZeneca vaccine, which will be produced locally from June by Siam Bioscience.

Travel Advisories (new update/s)

- Singapore: Singapore will tighten its border measures for people with travel history to Vietnam. Starting today (February 12), Singaporeans, permanent residents and long-term pass holders arriving in Singapore with travel history to Vietnam in the 14 days prior to departure will have to take an on-arrival COVID-19 PCR test, serve a 14-day stay-home notice at dedicated facilities and undergo a PCR test before the end of the notice period. Short-term travellers with an Air Travel Pass (ATP) with travel history to Vietnam within the last 14 days before departure for Singapore will not be allowed to enter Singapore. All travellers who are not Singaporeans or permanent residents will need to take a COVID-19 PCR test within 72 hours before departure. These travellers will still be required to undergo an on-arrival test and serve their stay-home notice upon arrival and be tested at the end of isolation period.
