

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of July 13, 2020 (2:00 PM GMT+8)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been almost 13 million cases, and over 570,000 deaths attributed to COVID-19. According to the World Health Organization (WHO) the pandemic has been accelerating. The cumulative number of cases worldwide has doubled in the last six weeks, and today the largest single-day increase has been reported with over 230,370 new infections in the last 24-hours. The previous WHO record for new cases was 228,102 on July 10. In Africa, cases have risen 24% in the past week reaching over 500,000 cases, while infections in Latin America and the Caribbean surpassed 3 million this week. In Africa, the country with the greatest number of reported cases has been South Africa where cases have doubled this week. Over 4,000 health care workers have been infected in South Africa, which is at least half of the 8,000 total health care workers reported to have become infected throughout the African continent.
- The World Health Organization (WHO) has published an Emergency Global Supply Chain System (COVID-19) catalogue listing all medical devices, including personal protective equipment, medical equipment, medical consumables, single use devices, and laboratory and test-related devices, which may be requested through the COVID-19 Supply Portal. WHO also surveyed networks of laboratories to map out global animal laboratory capacity around the world to potentially help with accelerating vaccine and therapeutic evaluation (WHO Situation Report 174).
- The catalogue represents an initial prioritized selection of items and are subject to constant review. The World Health Organization has urged Indonesia to perform more COVID-19 polymerase chain reaction (PCR) tests on people suspected to have the illness because it has noted a “substantially high” number of deaths among patients under surveillance (PDP) and people under observation (ODP). As of July 12, the Ministry of Health announced 1,681 new confirmed COVID-19 cases bringing the total number of infections nationwide to 75,699 with 75 new deaths bringing total death toll to 3,606.
- Cambodia’s Ministry of Health on July 12 confirmed 15 new imported COVID-19 cases, bringing the total number of infections in the country to 156. This represents an 11% increase in the cumulative case count since the last reporting date (June 28). This is the first time that the country reports over 10 new cases.
- The Philippines’ Department of Health today (July 13) reported that the country has the highest single-day COVID-19 death tally on July 12. Department of Health (DOH) authority said that 162 deaths were recorded but has clarified that most of the deaths occurred in May and June. Out of the 162 deaths recorded, 18 patients infected with coronavirus died last week. It was mentioned that more deaths are expected to be reported in the coming days as a result of DOH’s data reconciliation efforts in cooperation with local governments. The country’s case fatality rate is improving at 2.7 percent compared to the 4.5 percent global rate, according to the DOH. However, it noted that the percentage of people testing positive for COVID-19 is worsening. The Philippines’ positivity rate is at 7.8 percent as compared to the less than 5 percent benchmark set by the World Health Organization. As of July 12, the country recorded a total of 56,259 new COVID-19 cases and currently have 38,679 active cases with 92.2 percent of patients exhibiting mild flu-like symptoms and 7.1 percent not showing any signs.

- According to a Thai researcher on July 12, a novel coronavirus vaccine (CU-Cov19) being developed by a Thai research team in collaboration with the University of Pennsylvania is expected to enter mass production by the end of the third quarter next year. Non-human primates which received a second dose of the vaccine displayed high levels of COVID-19 antibodies, which the research team called an encouraging sign in light of the upcoming human trials scheduled in October. The team has been testing Cu-Cov19, an mRNA vaccine, on 13 macaques at Chulalongkorn University's National Primate Research Centre in Saraburi.

Travel Advisories (no new update/s)

Cases and Deaths as of 10 July 2020

- As of July 13 (2PM, GMT+8), worldwide, there were **12,974,633** confirmed cases, including **557,680** deaths. Globally, Case Fatality Ratio (CFR)* is **4.30**
- In **China**, there were **85,561** confirmed cases with **4,648** deaths, including deaths in Hong Kong (7) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (1,470), Macau (46), and Taiwan (451).
- 190,873** (4,016 new) **confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **5,355** (233 new) **deaths**. CFR in ASEAN Region is **2.81**.

REGION	COUNTRY	FIRST CONFIRMED CASE(S)	LATEST REPORT ON CONFIRMED CASE(S)	TOTAL CONFIRMED CASES (NEW CASES)	TOTAL DEATHS (NEW DEATHS)	CASE FATALITY RATIO
