

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of December 23, 2020 (2:00 PM GMT+8)

Canada

COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 78.1 million cases and more than 1.71 million deaths attributed to COVID-19.
- On December 21, media sources reported the first cases of COVID-19 in Antarctica. Approximately 36 new infections were confirmed at a Chilean military base (General Bernardo O'Higgins Research Base), which included 26 army members and 10 maintenance workers. All 36 individuals who tested positive for the virus are currently in isolation in Punta Arenas, Chile and are said to be in stable condition. A new group of replacement personnel was quarantined, tested, and sent to replace the affected group in Antarctica. The uninhabited continent usually has between 1,000 to 5,000 scientists and support staff residents who stay throughout the winter at research facilities. As a result of this outbreak, all major research projects have been halted. With the confirmation of cases in the antarctic, the pandemic has now affected all continents.
- 427 new cases were reported in Thailand on December 22, bring the country's total number of COVID-19 cases to 5,716. For nearly seven months, the seven-day rolling average number of daily new cases remained in the single-digits. Thailand, the first country to record a case of COVID-19 outside of China, has been largely successful in mitigating the spread of the virus due to strict entry requirements, and a robust contact tracing network. However, a large cluster of cases tied to a shrimp market in Samut Sakhon province has resulted in the country's worst outbreak to date. The market, which has since been closed, serves as a commercial hub for seafood in Thailand — an industry in which thousands of migrant workers are involved. Four cases were identified from the market on December 18, and by December 20 this number had grown to 689. Migrant workers represented over three-quarters of positive tests. Early investigations indicate that all incident cases are linked to a 67-year-old seafood vendor, who has no travel history of leaving the country. In the past few days alone, the outbreak has resulted in more than 1,100 confirmed infections (for context, Thailand had previously reported fewer than 5,000 cases of COVID-19 since January 1, 2020). As a result, the entire province has been placed under lockdown and midnight to 5 a.m. curfew is in effect. Upwards to 40,000 people are currently being tested in Samut Sakhon and nearby provinces as a precaution. Additionally, health officials have recommended that buyers from more than 20 provinces who had visited the shrimp market between December 1 to 18, should get tested. Schools in three districts of Bangkok, which share a border with Samut Sakhon, have been ordered to close until January 4, 2021. The event comes mere days after Thai officials decided to relax travel restrictions for citizens from over 50 countries, in an effort to stimulate tourism. Among others, travellers from Australia, France, and the United States will be able to enter Thailand, visa-free, although documentation of a negative PCR test for COVID-19 within 72 hours, and a reservation to an approved quarantine hotel is required for all arrivals. Visitors must now complete three COVID-19 tests during a 14-day quarantine, up from two previously required. Other visa extensions have been noted.
- Myanmar closed off public gardens, parks and a lake in its biggest city Yangon on Monday (Dec 21), hoping to prevent a spike in COVID-19 cases during year-end holidays. City officials trying to protect recent gains in containing COVID-19 infections put up barricades, signs and cordons around the Mahabandula park and along the banks of the Inya lake, among other

popular sites known for drawing holiday crowds. The closures come amid fears that fatigue and frustration from the coronavirus crisis and containment measures could see a larger turnout than usual this year.

Vaccine Update

- On December 18, the U.S. FDA issued an Emergency Use Authorization (EUA) for the Moderna vaccine, following recommendations by the Vaccine and Related Biological Advisory Committee (VRBPAC). The move has made Moderna the second COVID-19 vaccine to be authorized for use in the United States. Notably, VRBPAC recommends the use of the Moderna vaccine for adults aged 18 and over, administered in two doses taken 28 days apart. The Moderna vaccine has less stringent cold chain requirements than the Pfizer/BioNTech vaccine. The approval of this candidate provides an alternative to health systems across the country that face logistical challenges in storage, distribution, and access to the Pfizer/BioNTech vaccine.
- On December 21, the European Commission granted approval for the Pfizer/BioNTech COVID-19 vaccine for use across the EU. The announcement comes one day following a formal recommendation that was issued by the European Medicines Agency (EMA) upon the safety and efficacy of the candidate based on Phase 3 clinical trials. Administration of the vaccine is set to begin in some EU states as early as December 27. The EMA suggested the use of the vaccine in individuals aged 16 and over, and has stated that consideration of pregnant women should be done on a case-by-case basis, citing limited representation of this group in clinical trials. The EMA was originally scheduled to evaluate the Pfizer/BioNTech candidate on December 29, although the meeting was expedited. The EU's approval for the vaccine comes roughly three weeks after Britain's, where vaccination campaigns have already begun, and 10 days after the U.S.

Travel Advisories (new update/s)

- Indonesia: The government is restricting state civil servants from traveling out of town and taking leave as part of its efforts to avoid a COVID-19 case surge following the Christmas and New Year celebrations. The new policy is stipulated in Administrative and Bureaucratic Reform Ministry (Kemenpan-RB) circular No. 72/2020 on travel and leave restrictions during the COVID-19 pandemic, which was issued on December 21. The rules take effect from December 21 to January 8, 2021. In a situation where a civil servant needs to travel out of town, they have to be aware of virus infection risk zoning, of local regulations at their destinations in regard to people's movement restrictions during the pandemic and to comply with health protocols, including those on traveling, at all times.
- Philippines: On December 23, the Philippines' official said in a statement that all flights from the United Kingdom are banned as the European nation battles a more infectious COVID-19 strain. All United Kingdom flights to the Philippines are suspended starting December 24 until December 31.

- Japan: Japan will ban the entry of non-citizens flying from the United Kingdom starting Thursday (December 24), following the emergence of a highly infectious new coronavirus strain. Starting next week, Japanese nationals coming from Britain would be asked to submit a certificate to confirm they had tested negative for COVID-19 within 72 hours of their departure.

Cases and Deaths as of 23 December 2020

- As of December 23 (2PM, GMT+8), worldwide, there were **78,407,195** confirmed cases, including **1,722,886** deaths. Globally, Case Fatality Rate (CFR) is **2.20**.
- In **China**, there were **95,984** confirmed cases with **4,773** deaths, including deaths in Hong Kong (132) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (8,301), Macau (46), and Taiwan (770).
- 1,422,428 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **32,328 deaths**.

				76,888,783	501,392	1,685,785	10,910	

**The calculated CFR is based on reported deaths and reported case counts, and does not account for recovered cases over time or rate of testing in a particular region*

*** Approximately 36 new infections were confirmed at a Chilean military base (General Bernardo O'Higgins Research Base), which included 26 army members and 10 maintenance workers.*

COVID-19 Epi curve among ASEAN Countries
