

Risk Assessment for International Dissemination of COVID-19 to the ASEAN Region

ASEAN Biodiaspora Virtual Center (ABVC)

as of January 29, 2021 (2:00 PM GMT+8)

COVID-19: Highlights and Situation Overview

- Worldwide, there have been over 101.9 million cases and more than 2.19 million deaths attributed to COVID-19.
- The World Health Organization (WHO) on Wednesday announced that the new variant of the coronavirus disease (Covid-19), which was first spotted in the UK, has now spread to 70 countries. In its latest epidemiological update, the UN health agency said that the coronavirus variant found in South Africa, B.1.351, has been reported from eight additional countries in the past week, taking the total to 31 countries. Meanwhile, the virus variant discovered in Brazil has now been reported in eight countries. The UK variant has shown to have relatively greater transmissibility and evidence of an increase in disease severity, according to the results from some recent studies. The WHO, however, has underlined that the results are preliminary, and more analyses are required to further corroborate those findings. In the United Kingdom, a decreasing trend in COVID-19 cases has been observed from January 11 through January 24, the health agency further stated.
- A team of World Health Organization (WHO) investigators examining the origins of the coronavirus pandemic left their hotel in the Chinese city of Wuhan on Thursday afternoon, after completing a two-week quarantine. The WHO team will meet Chinese scientists on Friday and plans to visit labs, markets and hospitals in Wuhan. The team also plans to visit hospitals, laboratories and markets. Field visits will include the Wuhan Institute of Virology, Huanan market, Wuhan CDC (Center for Disease Control and Prevention) laboratory.
- Vietnam government reported two locally transmitted COVID-19 cases after 55 consecutive days without local transmission. The local case in Hai Duong was linked to a factory worker who tested positive for the UK variant of the virus after arriving for work in Japan. The second community case is an airport worker, employed at Van Don International Airport in Quang Ninh. The airport has handled several repatriation flights and is likely to be the case for the worker testing positive. As a precaution and due to the new outbreak, Vietnam has extended the quarantine period to 21 days from the present 14 days.

Vaccine Update

- According to Singapore's Ministry of Health on Thursday (January 28), more than 113,000 people have received their first dose of the Pfizer-BioNTech COVID-19 vaccine. Among them, there were 432 *adverse event reports* linked to symptoms generally associated with all vaccinations. These include injection site swelling, fever, fatigue, headache, body aches, giddiness, nausea and allergic reactions such as itch, rash, swelling of eyes and lips. According to the MOH, most of these symptoms resolved on their own within a few days.
- Biotech company announced on Thursday (January 28) that an experimental coronavirus vaccine Novavax is 89.3% effective at preventing COVID-19. Results from Novavax's Phase 3 trial in the United Kingdom demonstrated the vaccine candidate's efficacy and showed that it protected against the U.K. variant of the virus. Results from another trial, in South Africa, showed that it was also effective against the variant that emerged there, although efficacy was lower.

Travel Advisories (new update/s)

- Singapore: Singapore and India are in talks about resuming scheduled commercial passenger flights gradually between the two countries. The Civil Aviation Authority of Singapore (CAAS) has said that Singapore is not discussing an air travel bubble arrangement with India in which leisure travel can resume. Air travel bubbles, such as the one agreed between Singapore and Hong Kong, would have given travellers special exemption from quarantine rules. The resumption of commercial flights would not automatically come with such

exemptions, unless agreed upon by countries. It said air travel between Singapore and India is currently restricted only to special repatriation flights chartered by the Indian government.

- Vietnam: As a response to the new outbreak in the country, Quang Ninh has suspended all public transportation. Van Don Airport, where a case was reported, has also been locked down and contact tracing is underway.

Cases and Deaths as of 29 January 2021

- As of 29 January (2PM, GMT+8), worldwide, there were **102,015,100** confirmed cases, including **2,198,765** deaths. Globally, Case Fatality Rate (CFR) is **2.2**.
- In **China**, there were **100,567** confirmed cases with **4,820** deaths, including deaths in Hong Kong (177) and Taiwan (7). Confirmed cases in China include confirmed cases in Hong Kong (10,322), Macau (47), and Taiwan (895).
- **1,972,812 confirmed cases** of COVID-19 have been reported in the ASEAN region with a total of **43846 deaths**, with a CFR of **2.2**.
